PA sleeves

Special Manufacture

We manufacture to a sample, specifications or a drawing, according to your requirements. In this case we process purchased parts or components provided by you.

Printing service

Whether company name, website address or your personal text – any wish is possible with us.

Portfolio

You look for it? We have it!

An extensive range of special cables completes our portfolio.

So different and varied our cables and wires are, so wide-ranging are our products on the national and international markets – all together in 65 countries.

Do you already know our brand Semoflex®? It symbolizes long product life and thus reliability.

PUR cables

Our PUR cables increase safety on your construction site. You get our PUR cables in various colors such as yellow, orange, red, blue or green – each one directly from our warehouse with short delivery times and already from small quantities.

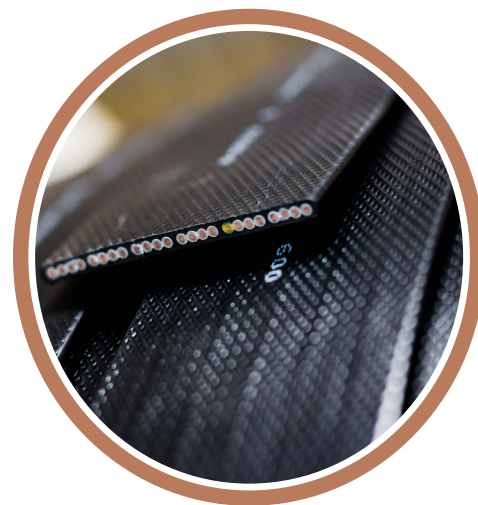

Reeling cables

We developed out Semoflex® Drum for outdoors use. By using new materials we have been able to achieve a considerable reduction in weight and diameter, as well as longer service lives than traditional reeling cables.

Lift control cables

As a long-term partner in lift construction we can prepare construction for the highest load and flexibility with long service lives. Our cables can be delivered in a range of versions – shielded or partly shielded.

Flat cables

If it has to be flexible and space saving, our flat cables come to the fore. They are suitable for power and control lines. We have cables available ex-stock which are shielded, cables featuring carrier elements as well as cables as combination versions.

Portfolio

You benefit from 40 years of experience and extensive technical knowledge that we acquired in various sectors.

You get optimal advice and support from one of our sales staff. Your personal contact person will hold a conversation with you to record the current status.

Our own technical development department supports you for a custom-made production.

Drag chain cables

The Semoflex® Roboschlepp® designed from us is based on many years of experience and extensive technical knowledge. Due to their multi-sided properties, the cables are also suitable for applications in smaller drag chains.

Construction lift cables

They are applied in building hoists for the transport of persons and material. To our product range belongs the Semoflex® Baulift T for cable basket application as well as the Semoflex® Baulift-W for cable trolley.

Electronic cables

They are required as electronic-, installations- and data cables and must therefore meet the most various requirements. In order to exhaust it at its best, we propose multisided products.

Standard cables

We hold ready for you a small range of standard cables and power cables like PVC hose cables, rubber hose cables, grounding cables, installation cables, telephone cables and machinery control cables.

Certifications

Qualität bears a name –

Baude Kabeltechnik GmbH.

Our cables and power cables features a certification according to VDE, UL and CSA.

The whole Baude-Group is certified according to DIN EN ISO 9001:2015.
